- **Accountability** – delivering as promised on time and on budget.

## SHEQ MANAGEMENT SYSTEMS

MPM subscribes to “Zero harm” at work policy. We see value in having efficient and effective management systems that support our employees and subcontractors return to home each day injury and illness free.

Our safety, health, environment and quality management systems have been audited and accredited against the following standards:

- BS OHSAS 18001:2007
- ISO 14001:2015
- ISO 9001:2015

## OUR COMPANY

### MPM Group

The MPM Group is a multi discipline mechanical services contracting firm consisting of three distinct divisions specialising in:

- heating, ventilation and air-conditioning installation
- maintenance and service of mechanical services
- sheet metal ductwork, general fabrication and insulation for the mechanical services industry

### DuctworX Pty Ltd

DuctworX is a privately owned sheetmetal fabrication company, established in 2007.

Initially involved solely in the manufacture of commercial air conditioning ductwork, we have now developed through our other work in general sheet metal and stainless steel into a broad based mechanical services company.

Ductworx have manufactured and supplied ductwork and sheet metal products to various construction projects within the following sectors:

- institutional work
- office and commercial
- retail
- healthcare
- leisure and entertainment
- education
- residential apartments
- mining

## OUR BUSINESS

Duct & Sheet Metal Manufacturing

Ductwork

Coil Line Machine

# DUCTWORX

## OUR BUSINESS

### General

The DuctworX fabrication facility located in Malaga covers 3000 square metres and has a manufacturing capacity of \$6.5M of duct per annum.

Rapid manufacture and deployment of duct is facilitated by our internal ownership of the factory. DuctworX is able to prioritise duct in immediate response to client requirements.

DuctworX employs qualified, experienced staff to manufacture high quality sheet metal products

DuctworX stringent quality regimes ensure duct and sheet metal production meets the highest industry standards.

### Latest Technology

DuctworX is equipped with a state of the art fabrication plant including plasma cutters, coil lines and high pressure water cutting machinery integrated with fully automated manufacturing software.

Approved construction drawings are directly uploaded to the Vulcan control and fabrication module using the Camduct software protocol. Cadduct files are transferred to the fabrication systems where the software extracts the spatial parameters of the drawing and transposes them into the Vulcan fabrication language. The Vulcan software initiates production by commanding the coil line, plasma cutter and waterjet and "nests" the data within the sheet meal and insulation to minimise waste and maximise production efficiency and together with the use of DuctworX's unique barcode tracking system, every item to be manufactured is barcoded, scanned and checked through the various stages of the production process.

## NEW PERTH STADIUM

**Client:** Mechanical Project Management  
**Year:** 2016

The Perth Stadium is a multipurpose stadium under construction in Burswood. Ductworx have been contracted to design and manufacture the ductwork for the mechanical services.

## AIRPORT TERMINAL 1

**Client:** Mechanical Project Management  
**Year:** 2015 & 2016

DuctworX designed and manufactured the ductwork for the mechanical services scope of work at the Arrivals and Departures area in Terminal 1.

## BUSSELTON HOSPITAL

**Client:** Mechanical Project Management  
**Year:** 2015

The Busselton Health Campus is located on Mill Road, Busselton. DuctworX, designed and manufactured all sheetmetal ductwork and insulation for the mechanical services scope of works.

## PROJECTS

DuctworX have manufactured and supplied ductwork and sheetmetal products to numerous constructions projects, within the following sectors:

- institutional work
- office and commercial
- retail
- healthcare
- leisure and entertainment
- education
- residential apartments
- mining

## COCKBURN OPERATIONS CENTRE

**Client:** Fredon  
**Year:** 2016

The Cockburn Operations Centre is located in Wellard Street, Bibra Lake. Ductworx was engaged to design and manufacture the ductwork for the mechanical services.

## BANKWEST FITOUTS

**Client:** AMEK Engineering  
**Year:** 2016

Ductworx were contracted to design and manufacture the ductwork for the mechanical services, at the Bankwest offices in Lake Grace, Moora, Geraldton and Narrogin.
